The radio audience results for Île-de-France cover the period from December 29, 2025, to March 29, 2026: 3,764 interviews for the MONDAY - FRIDAY period, conducted among the population aged 13 and older.

• Audience data collected from the previous day, from 5:00 a.m. to 5:00 a.m. the following morning, using a spontaneous response method. Respondents name the radio stations they listened to on their own, without being prompted.
• Interviews were conducted Monday through Sunday via cell phone and landline to maximize the likelihood of reaching the Population by phone.
• Optimisation of the survey process to ensure maximum reach of the Population by phone. Calls are made between 3:30 p.m. and 8:30 p.m. Monday through Friday, from 11:00 a.m. to 2:00 p.m. and from 3:00 p.m. to 8:00 p.m. on Saturday, and between 3:00 p.m. and 8:00 p.m. on Sunday.

• Daily control of the sample's sociodemographic representativeness, with an even distribution of interviews across survey days.
• The audience results are based on the "MONDAY - FRIDAY" time frame, which excludes Days of Lower Activity (DLA)—days on which the national activity rate is below 55%. During the January–March 2026 period, 5 LDAs were recorded: the week from Monday, December 29, 2025, to Friday, January 2, 2026.
• Only the cumulative audience allows for the calculation of the number of listeners: Cumulative audience (in %) × 106,950 = number of listeners.
Audience share, however, cannot be calculated in this manner.
