Survey features

Médiamat, the benchmark in television audience measurement in France, provides daily **audience figures for programmes watched anywhere, on any screen, live, timeshifted, on replay or preview**, by all French people aged 4 and over, i.e. **62.4 million** individuals.

The measurement is based on **2 representative panels** :

- A first panel of around **12,000 individuals** in **5,500 households**, comprising :
 - 5,000 households equipped with home TV sets, each connected to a fixed audimeter, the source of home TV audience measurement
 - 500 households without home TV sets
- A second panel of around **5,000 individuals** carrying a **personal portable meter** to measure TV audiences out of home (all screens) and on Internet screens at home. These audiences are then attributed to the individuals in the first panel by statistical fusion.
