

# Press release

9th July 2024

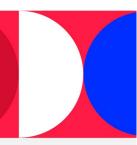

### Médiamat'Thématik

# From 1st January to 16th June 2024

The audience for special-interest channels among viewers aged 4 and over.

# Audiences of special-interest channels: Key Figures

## 48,1 million

people aged 4 and over watch at least one special-interest channel **every month**, i.e. **77%** of the French population **12,3 million** watch at least one special-interest channel **every day** 

### 8,8%

Audience share for special-interest channels

It amounts to 22% among the paid reception subscribers surveyed\*

For the first time, Médiamat'Thématik includes the audience :

- of French people not equipped with a television set at home
- of TV content watched on an Internet screen at home
- of French people with TV sets at home without ADSL, cable, fibre or satellite reception

From now on, Médiamat'Thématik will show the television audience regardless of the location (home, away from home), the screen used (TV set, computer, smartphone, tablet) and the mode of consumption (live, deferred, replay, preview) for all French people aged 4 and over.

Please note: This methodological change makes it impossible to compare the results with previous waves of the study.

\*Universe created from the observed consumption of paid special-interest channels and the equipment declared by panellists. See the full definition on page 6

**FRANCEINFO** 

Médiamat'Thématik From 1st January to 16th June 2024

### **Survey features**

Médiamat'Thématik, the benchmark automatic measurement of the audience for specialinterest channels in France, shows the audience for these channels everywhere, on all screens and viewed live, deferred, replay or preview by all French people aged 4 and over, i.e. 62.5 million individuals.

Interpretation of the audience results from the Médiamat'Thématik study must take into account the diversity of the audience for each channel (some channels are aimed at specific audiences), the competitive environment, whether the channel is available on one or more platforms as a basic or optional service, and the length of time each channel has been available on satellite, ADSL, cable or fibre optic. An individual who does not subscribe to a channel over the whole period may have watched the channel during part of the period (promotional offers, subscription or unsubscription during the period, multiple subscriptions, cast function, away from home, etc.)..

Audience share as a percentage: share that represents the viewing time for a channel over the total viewing time for television media among people receiving television in their homes via satellite, broadband internet, cable or optical fibre. The results are provided in an average of Monday to Sunday, throughout the day (3 am to 3 am). The reference is the audience share calculated on a Total TV base.

Four-week coverage: the number of people aged 4 years + - from among the people receiving television by satellite, broadband, cable or optical fibre having watched the channel for at least 10 consecutive seconds on average over four consecutive weeks.

« Established Pay-TV reception »: This universe is built from the established special-interest channels consumption and the reported equipment of the panelists. It includes people living in households receiving a TV offer via an Internet service provider (Orange, Free, Bouyques, SFR) where at least 5 Pay-TV special-interest channels have been watched within one month and the reported Canalsat / Family+ Package from Canal+ subscribers.

### About Médiamétrie a trusted third party for fair and objective measurements

Médiamétrie is committed to providing its customers with joint and sovereign standard audience measurements. As a data leader and media expert, the company applies its know-how to video, audio and cross-media behaviour measurements, as well as advertising effectiveness measurement. Every day, some 800 employees design and produce the right measure for today and tomorrow to support the free decision-making of the company's customers in France and

In 2023, the Médiamétrie Group achieved a turnover of nearly €104.1 million and processed over one billion data every day.
